

VERSION SHOWING CHANGES MADE

In the Claims:

Please amend claims 1 and 13 as follows:

1. (Twice Amended) A dish drainer and tray set comprising:

a dish drainer having [an interior and] a perforate base and a perimeter wall extending upward from the base, the perimeter wall and base defining an interior of the dish drainer;

a separate and discrete tray having a footprint larger [then] than the base of the dish drainer when the tray is in a first deployed configuration, the discrete tray being positionable substantially beneath the base of the dish drainer; and

the discrete tray being [compacted] compactable to a [size] second storage configuration and positionable [sufficiently small to allow the tray to fit] entirely within the interior of the dish drainer when the tray is in [a] the second storage configuration.

13. (Twice Amended) A combination dish drainer, tray set and package comprising;

a dish drainer having a perforate bottom, upstanding perimeter walls and an open top which together define a drainer interior;

a separate and discrete tray configurable in a first compacted storage configuration and a second deployed configuration, the tray [fitting] being positionable entirely within the drainer interior when in the storage configuration [and], the tray having a footprint greater than the bottom of the drainer and being positionable substantially beneath the perforate bottom when in the deployed configuration[, the tray being in its storage configuration]; and

a package that is sized to contain the drainer when the tray is in the compacted storage configuration and positioned in the drainer interior, and [wherein the package] is [too small] not of sufficient size to contain the drainer and tray when the tray [when] is in the deployed configuration.
